# WHAT'S UP?

We thank God for His grace! Fellows of cohort 3 have graduated and fellows of cohort 4 are here! The Graduation and Induction Ceremony was a meaningful time with Rev. Morris Appiah, Mr. Michael Nyarko-Ampem and Mrs. Petra Aba Asamoah but I will let you read that for yourself in this newsletter. What I would like to share is an excerpt of Dr. Otabil's message to the graduating class:

***“As the world awakens from the pandemic, you have the unique opportunity to use your skills to help the nation recover and increase. The devastation that comes from a forest fire, tornado or hurricane is heart-wrenching but it is always an opportunity to start afresh and create something better.”***

(You can read the full message from our graduation brochure [here](#).)

**Mrs. Ewurama Bennin**  
Programme Manager

Dr. Otabil's words are also true of us at the Central Leadership Program. As we emerge from the pandemic, we have recruited our largest cohort of 30 fellows, and we look forward to working with them to change our continent and our world. I would encourage you to take a look at the statistics for those who made it onto the program.

In this edition of our newsletter, we introduce you to all the willing volunteers who are supporting our work at several levels. We have new volunteers as Implementation Committee Members, Social Impact Project Mentors, Faculty Aides and members of other support groups.

Finally, this edition also celebrates the impact made by our partners, members of faculty and Team ICUBE.

We encourage you to follow us on our social media pages [@clpghana](#) (Instagram, Twitter, LinkedIn and Facebook). **We would also like you to donate to support our work by using our USSD code \*422\*600#.**

God bless you and happy reading!

# BOE IMPACT

by **TEAM ICUBE**

Team ICUBE is a Social Impact Project group of the second cohort which is made up of Beacons of Excellence **Daniel Tagoe, Michael Agyemang and Ruby Botchway.**

The goal of their project is to encourage the youth to be innovative and to come up with ideas to help solve the problems of Ghana and Africa.

As part of the first phase of their project, the team in collaboration with Dext Technologies provided twenty-five science sets to the students of Weweso Basic Senior School in the Ashanti Region. They also took the students on an excursion to Dext Technologies to see how the science sets were made.

The next stage of their project will be to carry out periodic evaluations to discover how the science sets influence the students' academic performance.

We say "Well done!" Team ICUBE.
